

GPS Tracking System

XtraNet's Cloud Based GPS tracking system is a combined - GPS & SMS tracking technology with flexible, advanced mapping and reporting web application. A SMS & GPS enabled tracking device is provided to collect and send tracking data via cellular network, which works best for your operations. The device then delivers the data to the Tracking System hosted application, which can be accessed through the web at any time. You receive real-time GPS tracking updates, including location, speed, date time, battery meter and more, allowing you to manage a tighter schedule.
